

P2P BRACKETS

P2P Bracket Mount Check Valves on Parallel Arms

BENCO's P2P Bracket holds two standard TeeJet check valves and bolts right onto the parallel arms of your planter for a solid and clean install. This universal bracket fits any color of planter or can be used on other machinery. The single mounting bolt allows the bracket to rotate to the best angle for your row units.

BENCO P2P Brackets are an inexpensive way to make servicing your planter a little easier and look a lot nicer. You will love how much easier it is access your orifice plates for cleaning when the check valve holding them is securely mounted to the planter.

Order 1 bracket per row.

500 P2P Bracket \$5 each

TANK BRACKETS

Heavy Duty Tank Brackets for Planters

We have bracket kits for most popular planters and tank skids.

BENCO's tank brackets are overbuilt to handle years of rough use in the field. We make kits for most models of planters and styles of skids.

Ask about our brackets that integrate hydraulic pump mounts right into the brackets, making pump installation and plumbing that much easier.

DOSATRON KITS

Dosatron water-powered pumps give you an adjustable metered injection that is always perfectly proportioned to your flow rate.

BENCO's Kit comes with the Dosatron, heavy duty stand, tank, all hoses, valves and fittings already assembled. Tank agitation is available.

D14M22 Kit (0.2% - 2.0% rate, 14 GPM)		
517-01-DOS10-2	10 gallon tank	\$1,005
517-01-DOS10-2A	10 gal. + Agitation	\$1,170
517-01-DOS15-2	15 gallon tank	\$1,065
517-01-DOS15-2A	15 gal. + Agitation	\$1,235
D14M25 Kit (0.5% - 5.0% rate, 14 GPM)		
517-01-DOS10-5	10 gallon tank	\$1,535
517-01-DOS10-5A	10 gal. + Agitation	\$1,700
517-01-DOS15-5	15 gallon tank	\$1,595
517-01-DOS15-5A	15 gal. + Agitation	\$1,765

CONE TANK KITS

Like everything we make, BENCO's Cone tank stands are designed for field use, and affordably priced for farmers of any size. Add a venturi and check valve to inject chemical into the pressurized side, keeping your water tank and pump chemical free.

Kits Include Tank, Stand, Valve, Tee, & 2" Fittings

15 Gallon Kit	500 CI015	\$231
30 Gallon Kit	500 CI30	\$345
30 Gallon + Venturi	500 CI30V	\$761
60 Gallon Kit	500 CI60	\$510
60 Gallon + Venturi	500 CI60V	\$935
85 Gallon Kit	500 CI85	\$557
2" Check Valve	102 MCV200	\$24

Kits for 3" plumbing also available.

MOTOR CONTROLS

BENCO'S MOTOR CONTROL LINE

LIFT SWITCH KITS

Affordable Application Rate Control for 12V Pumps

Taking control of your liquid doesn't have to cost a fortune. BENCO Motor Controls work by varying the power to the electric pump, controlling it like a dimmer on a light. This simple box gives you precise manual control of your system pressures and application rates without additional complex electronics or the high-tech price tag.

Simply flip the switch to turn on the system and start pumping. Rotate the knob to adjust the pressure in the system. Pressure changes will quickly show up on the unit's pressure gauge or on your monitor.

BENCO Motor Controls are a simple, easy, & effective way to manually control the liquid application rates on your machinery.

- Works with any 12V pump up to 30 Amps
- Easy to use & simple to install
- Completely manual system needs no other hardware
- Control liquid without complex & expensive monitors
- Continuously variable control for fine adjustment
- System responds to adjustments almost instantly
- Conveniently mounts anywhere in the cab
- Tried and tested for over 20 years
- Simple, effective, & affordable application rate control

MSC30-DD Digital Display Motor Control

The DD features a digital pressure display that is fed by a pressure transducer that can be added anywhere in the system. It is our most popular model for stand-alone applications.

MSC30-DD-C \$557.31

MSC30-NG Non-Gauged Motor Control

The NG is the perfect controller for any system where pressure is already being monitored and displayed by another system, like OnSite FMS. It simply regulates the pump and flow rate without any feedback from the system.

MSC30-NG-C \$378.03

MSC30-SSG Analog Gauged Motor Control

The old-school SSG features an analog stainless steel gauge to monitor the system pressure. A pressurized line must be run to the gauge.

MSC30-SSG-C \$423.17

MSC30-MOD PWM Motor Control

The MOD is controlled via a standard Pulse Width Modulation (PWM) signal from a separate controller. There is no power switch or manual control knob. It just regulates the pump as directed by the controlling system.

MSC30-PWM-C \$557.31

Push button lift switches are more reliable and less frustrating than traditional whisker switches. Benco's builds heavy duty lift switch brackets to fit almost any planter. Most can be installed on any row. Includes planter-specific bracket, switch & mounting hardware.
